

Replacement

Daimler Building - Art Deco Windows

The Daimler Building is a listed art deco building, originally constructed in 1931 by Wallis Gilbert & Partners of Hoover Building fame, to house the headquarters of the Daimler Hire Car Company. West Leigh replaced and installed all art deco windows on this prestigious building.

West Leigh - Total Window Care

Design Without Compromise

If your steel windows are effected by deep-seated rust, your aluminium windows badly corroded, your timber frames disintegrating from rot and falling to pieces, then you will have to consider replacement windows. Whether your requirement is for Steel or Aluminium windows, West Leigh can offer a design to suit.

The wide and varied experience with all facets of TOTAL WINDOW CARE means that West Leigh can offer a unique unbiased 'Technical Advisory Service'.

Our most commonly asked questions are:

- Should windows be replaced or repaired?
- What type of windows should we install?
- What type of material is appropriate?
- What method of fixing should be used?

We can answer all of these questions almost immediately in most cases, with a high level of assurance and expertise.

Where replacement is considered necessary, West Leigh can provide a full range of Steel and Aluminium windows, either on a supply only or a supply and install basis. Care is taken to ensure that the chosen product meets the necessary design and performance criteria.
