

# Repair

## Manfield House

Manfield House, located on The Strand in central London, was refurbished to create modern office spaces. However, the developers were keen to retain the appearance of the external facades in accordance with strict planning requirements.

West Leigh manufactured and installed approximately 175 W20 steel section windows.

## West Leigh - Total Window Care

All windows can benefit from West Leigh's repair and maintenance

In these days of escalating costs the upkeep of building facades is no longer a luxury but a necessity for all types of property.

Many faults on old steel windows are due to lack of maintenance and, not infrequently, too much paint. If your windows are sound but are just gummed up with dirt and paint, they can be repaired.

Aluminium and PVCu windows can benefit from new fittings, weatherstripping, lubrication and cleaning.

Curtain walling systems may require repairs to pressure plate, beads and gaskets.

Replacement glazing to steel, aluminium and PVCu windows together with their various bead systems.

Teleflex window winding gear, repair and servicing of all types of hydraulic closers, locks and overhead door closes, installation and repair to roller shutters, industrial doors, flexible doors, plastic strip curtains, window grills and guards are all part of West Leigh's TOTAL WINDOW CARE service.
